Puerto Rico Bill Patched Up—Masterly Inactivity in Africa.

Washington, March 22.—The conference on the Puerto Rican appropriation bill have agreed upon a compromise measure. The senate conferees receded from the senate amendment limiting the appropriation to revenues collected on Puerto Rican imports until the first of January, and restored the clause in the house bill applying to future revenues reading as follows: "Together with any further customs revenues collected on importations from Puerto Rico since January 1, 1900, or that shall hereafter be collected under existing law. The provision in the senate amendment specifying the purpose for which money shall be used is retained but an addition is made declaring specifically that it shall be for the aid and relief of the Puerto Ricans.

London, March 21.—Several telegrams have passed between President Kruger and the British government in addition to the Salisbury-Kruger correspondence already published. The office received a dispatch from Pretoria yesterday. The contents of these communications cannot yet be obtained. So far as the military situation is concerned there is practically no change.

London, March 21.—The Cape Town correspondent of the Daily Mail, telegraphing March 26, says: "I have just returned from Bloemfontein, where I learned that no further movement is probable for three weeks, as negotiations are proceeding. I should not be surprised if the war collapsed quickly.

London, March 22.—The only news from South Africa showing activity on either side comes from Warrenton, north of Kimberly, where desultory fighting occurred all Sunday resulting in the retreat of the Boers towards Christina under shell fire. The progress of this column towards Mafeking has either almost ceased or is forbidden to be mentioned in the dispatches. Nothing new comes from Colonel Plumer, and Mafeking apparently still awaits relief.

Before his departure for Baltimore General Haines said: "The present commissioners report will not only decide upon a practicable route for an Isthmian canal but will demonstrate conclusively that the route selected is the most feasible one that could have been chosen. We have at present about 300 surveyors in the field. They are going with the greatest care over the Nicaragua route, the Panama route and all the other routes suggested by former surveyors. Besides this we have a number of exploring parties out in the hope of discovering sites that have been thereto overlooked.

James J. Jacob, a full blooded Indian of the Chinle tribe, voluntarily returned to the United States last week to pay the penalty of death after wandering around a year, released according to Indian custom on his own recognizance. It is doubtful if there is an American within the vast domain of this republic who would voluntarily return under a conviction to pay the death penalty.

There should be a law against the offering of unreasonably heavy rewards for the arrest and conviction of criminals. As rule, the detective is strictly in for the money, and his efforts are directed toward securing a conviction and getting his reward regardless of the guilt or innocence of the party accused. Evidence easily purchased and the perjurer always ready to swear at the dictation of the detective. Innocent men have been convicted through the unscrupulous use of large rewards.
